DETAILED ACTION

1. This action is in response to the papers filed February 26, 2009. Currently, claims 1, 4, 11-21, 50-53 are pending. Claims 1, 4, 11-14, 18-21, 50-52 are allowable.
2. Claims 15-17, 53 are rejected.
3. All arguments have been thoroughly reviewed but are deemed non-persuasive for the reasons which follow. This action is made FINAL.
4. This action contains new grounds of rejection necessitated by amendment.
5. Any objections and rejections not reiterated below are hereby withdrawn.
 - a. The enablement, written description and 112/2nd rejections have been overcome in view of the amendments to the claims and arguments presented.

Election/Restrictions

6. Applicant's election with traverse of Group I, Claims 1-4, 11-21, 50-52 in the paper filed July 8, 2008 is acknowledged.

The response asserts that there would be no burden to search Groups I-III together, citing 803. The response asserts that each mutation comprises a single nucleotide substitution of SEQ ID NO: 2 and is associated with non-HFE hemochromatosis. This argument has been reviewed but is not persuasive. This application was filed under 371 and considers whether there is a single inventive concept which links the inventions. Here, as noted in the initial lack of unity requirement, claims drawn to 10 nucleotides do not make a contribution over the art. Furthermore, Group I, II and III are directed to mutations in the ferroportin 1 gene.

Art Unit: 1634

Mutations within the ferroportin 1 gene were known in the art at the time the invention was made, including A77D. Thus, there is no special technical feature which links the inventions and Groups I, II, and III will not be rejoined.

Claims 5-10, 22-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the paper filed July 8, 2008.

The requirement is still deemed proper and is therefore made FINAL.

This application contains Claims 5-10, 22-49 drawn to an invention nonelected with traverse in the paper filed July 8, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Priority

7. This application is a 371 of PCT/EP04/51068, filed June 9, 2004. The application also claims priority to ILALY MI2003A001156, filed June 9, 2003.

It is noted that a translation of the foreign document has not been received.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1634

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 15, 17, 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Fincher et al. (US 2008/0127376, May 29, 2008, filed September 20, 2000).

Fincher teaches nucleic acid molecules associated with plants. Fincher teaches SEQ ID NO: 15577 comprises 16 contiguous nucleotides of SEQ ID NO: 3 which comprise position 238. Specifically, Fincher teaches

Since Fincher teaches a nucleic acid comprising 16 nucleotides overlapping position 238 of SEQ ID NO: 3, Fincher teaches a polynucleotide as claimed.

9. Claims 15, 17, 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Xu et al. (Genbank Accession Number AV649238, January 2002).

Xu teaches the nucleic acid is a homo sapien cDNA clone GLCBRH01. Xu teaches a nucleic acid comprising 18 contiguous nucleotides including position 238 of SEQ ID NO: 3.

Conclusion

10. No claims allowable.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
